

Since WHEN should a business have the RIGHT to disturb MY FAMILY when we requested that they not be allowed to? IT'S a violation of our right to privacy. My wife and I cannot count the number of times that we have had to stop what we are doing to go see who is calling only to find out is some company trying to sell you something. You HAVE to check the phone because if you have kids, THEY may be trying to call you. It is a waste of our time.
